Sprint Report – Sprint 3

SLUG SPACE | TEAM HOMELESS-NO-MORE | Nov. 19, 2017

Action to stop doing:

- As a team we have decided that we cannot put off work until the last minute.

Actions to start doing:

- As a team we have decided to push more consistently and begin meeting more regularly again to create more teamwork among members
- Change our team meeting time in order to have meetings begin on-time.
- Push to github more often

Actions to continue doing:

- Communicating through slack about the project
- Making sure that our work is functional before pushing to github

Work completed this sprint:

- As a user I want to filter properties in order to identify properties that I am more interested in.
- As a landlord, I want to be able to customize my listings so that potential tenants will be able to see property features that interest them

Work not completed this sprint:

- As a user, I want to be able to post events in regards to my properties in order to update students about upcoming open houses, meetings, and other events
- As a user, I want to be able to express interest in properties in order to stay updated on all property events through my dashboard

Work Completion Rate:

We completed two user stories this sprint. We left the other user stories to 'flow-forward' into our next sprint because of the unexpected difficulty. We were not able to complete all of our user stories in the allotted time. We allocated about 40 hours for this sprint, and we did not allocate more time to this sprint. Below is our burnup chart showing our workflow during this sprint.

Burnup Chart Sprint 3
