Sprint Report – Sprint 1

SLUG SPACE | TEAM HOMELESS-NO-MORE | OCT. 22, 2017

Actions to stop doing: As a team, we have decided to stop the following actions/activities:

- Relying on only one person to update our Sprint board. All team members should be responsible for updating and maintaining our Sprint board on Trello.

Actions to start doing: As a team, we have decided to start doing the following actions/activities:

- Schedule longer team meetings on Mondays, Wednesdays, and Fridays to enhance our communication and get in more group work sessions.
- Have everyone contribute to maintaining the Sprint board. This helps us figure out what team members are working on and makes us more productive so it is definitely beneficial to have an up to date and maintained Sprint board.
- Find better ways to get everyone on the team involved. We should work towards splitting up tasks more so that everyone on the team has something to work on.

Actions to keep doing: As a team, we have decided to keep doing the following actions/activities:

- Continue doing code reviews before merging in our branches into our main development branch. It is always better to get a second (or even third) set of eyes on one's code before it is considered 'done' and merged in with our collective code base.
- Continue being effective as a team; we actually got most of out sprint commitments done.
- Continue doing a good job of showing up to meetings. Everyone is present to all of our meetings and we manage to start/end meetings on time. We do a great job of talking about what we need to get done during our meetings.
- Continue using Slack. Slack is a very effective means of communication for our team.

Work completed this Sprint:

- As a developer, I want to grow familiar with project environment and tools in order to work efficiently. (5)
- As a user, I want to create and log into my account in order to utilize the website. (3)
- As a user, I want to be able to view the Santa Cruz map in order to see locations relatively close to UCSC. (5)

Work not completed this Sprint:

- As a user, I want to be able to create new listings in order to store properties into the database for students to find. (3)

Matthew Shehan (team member)

Work completion rate: We completed a total of three user stories this Sprint with one user story "flowing-forward". Our initial estimate for the total number of ideal working hours was 30 hours for this Sprint. We bumped that up to 35 total ideal working hours following week 1 so we can appropriately allocate enough time to complete all that we want during the last week of the Sprint. Please refer to our sprint one burn up chart down below.
