Sprint Report – Sprint 2

SLUG SPACE | TEAM HOMELESS-NO-MORE | Nov. 5, 2017

Actions to stop doing: As a team, we decided to stop the following actions/activities:

- Working on someone else's branch/pushing to the wrong branch.

Actions to start doing: As a team, we decided to start the following actions/activities:

- Push our done/working code more often. This will enable us to do a better job with PRs and merging. Along with our Sprint board, this is also another way to figure out which tasks have been completed.
- Evaluate the dependencies of each user stories/tasks better. This will prevent us from hitting productivity roadblocks and will help us move faster.
- Be more active in collaborating about our work on Slack. This will help us figure out where each team member is at in their tasks (if a task has been completed and code has been pushed into our GitHub repository, if someone needs helps with a task, etc.).

Actions to continue doing: As a team, we decided to continue the following actions/activities:

- Continue being an effective team. The tasks for this sprint were split up so that everyone on the team worked on something. Each team member took the initiative to take on the tasks they were interested in.
- Continue doing a good job of showing up to meetings. Everyone was present to all of our meetings and we managed to start/end meetings on time. We did a great job of talking about what we needed to get done during our meetings.
- Continue using Slack. Slack is a very effective means of communication for our team.
- Continue having every team member contribute to maintaining the Sprint board. Our Sprint board was updated often this Sprint.

Work completed this Sprint:
- As a user, I want to be able to create new listings in order to store properties into the database for students to find.

- As a user, I want to be able to view all of the listings on the map in order to see the properties that interest me.

Work not completed this Sprint:
- As a landlord, I want to be able to post events in regard to my properties in order to update students about upcoming open houses, meetings, and other events.
- As a user, I want to be able to express interest in properties in order to stay updated on all property events through my dashboard.

Work completion rate: We completed a total of two user stories this Sprint with the other user stories "flowing-forward". Our initial estimate for the total number of ideal working hours was 40 hours for this Sprint. We bumped that up to 45 total ideal working hours following week 1 of Sprint 2 so we can appropriately allocate enough time to complete all that we want during the last week of the Sprint. Please refer to our sprint one burn up chart down below.

Burnup Chart Sprint 2
